How Kalyan Developers used SAP S/4HANA to Develop and Transform the Construction Industry

KALYANI DEVELOPERS has grown into one of the leading commercial establishment which provides to the changing profiles of Multi-National Companies with its able work force and expertise. The diversified portfolio of Kalyani Developers speaks volumes of the innovation, dedication and professionalism that it brings to work every day.

Before implementing SAP and collaborating with SAVIC, the company struggled with manual data entries, improper reporting, and time-consuming Excel-based models, leading to process inconsistencies. They needed to optimize SAP S/4 HANA software and improve revenue analysis. SAP and SAVIC streamlined processes with high-speed processing, real-time analytics, and integrated key business functions, accessible via the SAP Fiori launchpad on mobile devices. This resulted in efficient system interactions, improved transparency, operational efficiency, quicker customer response times, and support for field engineering projects.

50%
Increase in the accuracy of cost collecting

25%
Fast month -end reconciliation

18%
Time saving per week per foreman

20%
Increase in the speed of Cost information
